

## **Summary of Experience**

Robert Judge Jr. is an architect with The Hezner Corporation. Robert's responsibilities range from preliminary project analysis, planning, design development, construction document creation, engineering coordination and construction process administration. Robert is involved in multiple projects at any given time and is continually monitoring the quality control of each project to ensure that all of the design elements required by the owner and the local jurisdiction are met. Robert's awareness of sustainable design principals has sparked a passion for his continual research of sustainable building systems and applications.

Prior to joining the Hezner Corporation, Robert was a architectural project manager for the major renovation and new construction of various shopping centers, Jewel Osco grocery stores Portillo's restaurants and a Harley Davidson Dealership. Each prior project type consisted of various existing conditions along with specific project requirements. All of which have given Robert a firm understanding of jurisdictional process's, preliminary design, code compliance and project coordination
