

Summary of Experience

Earl Welton is an architectural associate with The Hezner Corporation and serves as a project manager in the production of construction documents and specifications. Earl works with project teams on efforts involving field surveys, fact-finding investigations and system and product selections. Earl focuses on design and project code compliance during design development and also with the management and execution of construction documents, shop drawing reviews and product submittals during construction administration.

Prior to joining The Hezner Corporation Earl had worked in a variety of positions that have contributed to his broad knowledge base including: project coordinator and estimator for large mechanical contractor with projects included private and public works; facilities management of a 10,000 square foot commercial fish hatchery; and site management for a large private estate
