

Summary of Experience

Keith Schodin serves as the Vice President of Field Operations for Hezcorp Construction Services, the general construction arm of The Hezner Corporation, and has worked directly with The Hezner Corporation and Hezcorp Construction Services for 23 years.

With 34 plus years of experience in the construction industry, Keith has been a part of many large and small scale construction efforts. Keith's knowledge of construction has come from family roots and his skills from doing the work necessary to get projects done. Keith inherently understands the comprehensive nature of construction and the construction process, and becomes part of the firm's process early, during schematic design and design development. Keith's involvement during the initial stages of design is critical for accurate cost modeling. This process helps The Hezner Corporation develop the most accurate and cost effective designs possible. Our team does not have to complete a design process to have a quantifiable and defensible idea of how much a project will cost.

As Director of Field Operations, Keith responsible for helping the firm maintain high quality levels on all projects and is directly involved with the day to day supervision of construction activities for Hezcorp Construction Services. Keith manages the project schedule, coordination of on-site superintendants and all subcontractors involved with each project we construct. Keith leaves no stone unturned and develops direct and effective relationships with each client. Among Keith's attributes are clear and direct communication skills, effective applications of technology, and quick responses to project inquiries and issues as they arise. Hezcorp Construction Services is focused on providing exemplary levels of service and Keith Schodin is a catalyst in each effort.
